

## Equipment Rental Program (ERP)

Need temporary extra production capability?

Why invest in capital equipment when you can enjoy the cash flow and possible tax savings of a rental whenever you have a need for extra production capacity.

Take advantage of rental contracts from RTI for some of the latest, most productive and most technologically advanced film archive and post production equipment available anywhere .

The contracts are available for as little as 12 months. They can include a full warranty, and...at the end of the contract, the product can be returned with no further obligation...or the contract can be extended/renewed...or the equipment can be purchased at a specially 'pre-agreed' price.

These ERP's are available in most countries. Please call us for details and we will customize an ERP plan just for your needs. Remember, rentals are available for all RTI Film Group machines.
